52 x 11' + 1 x 60' 3D/HD

L&M

**Facts for your success:**

- »» Kipling's immortal adventures in 3D HD animation
- »» Faithful to the original book
- »» Targets 6- to 10-year-olds as well as families

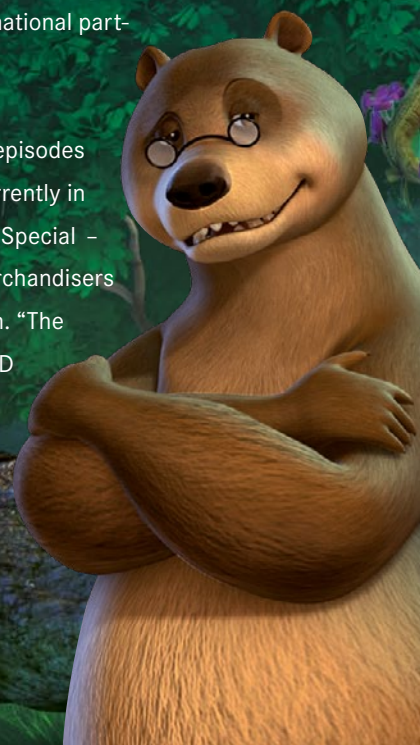

**M**owgli, Baloo, Bagheera, Shere Khan... magical names, memorized by children all over the world ever since Rudyard Kipling's immortal classic "The Jungle Book" came out over a century ago. The adventures of the boy raised by wolves in the Indian jungle leap to life for the first time ever in a 3D HD animated series for children aged 6 to 10.

Mowgli is a boy whose escapades reflect his daredevil spirit. How could a human raised by wolves not be adventurous! Especially when his best friends are a bear, a panther and a python. Blessed with a quick wit, a sharp instinct and an optimistic outlook on life, Mowgli learns to survive in the jungle – a major challenge with a tenacious enemy like the tiger Shere Khan!

The series also introduces other characters from Kipling's stories such as the wolf Akela and Mowgli's wolf "parents," and even human beings!

This first major animated retelling of "The Jungle Book" since the 1967 Disney production is more faithful to Kipling's beloved stories than previous adaptations. No wonder: it's produced by Hyderabad-based DQ Entertainment – a global leader in high-quality animated series and games – in India, the "home" of "The Jungle Book!" DQ Entertainment joins forces with coproducers ZDF, ZDF Enterprises and TF1, who are cooperating with various international partners including NBC International.

The series consists of 52 x 11' episodes currently in production, plus a 60-minute TV Special – offering broadcasters and merchandisers many opportunities for exploitation. "The Jungle Book", in stunning 3D HD with stereoscopic effects, is certain to enchant children and their families for years to come!
