

ADVENTURE. DANGER. HOMEWORK.

WICKED SCIENCE

Facts for your Success

- » Comedy, adventure, science
- » Including high quality 3D computer animation
- » Live-action series with a production value of EUR 5.74 Mio

When an accident in the school laboratory leaves them exposed to an extraordinary experimental ray, Elizabeth and Toby are left with 'scientific' superpowers. From this moment on the relative peace and harmony of the Sandy Bay School is shattered by flying lawn mowers, invisible cars, cloned headmasters, a rampaging T-Rex and other amazing discoveries by these new-found geniuses.

While Toby puts his genius into practice in amazing, adventurous yet peaceful inventions, Elizabeth has a totally different slant on using her power. Her inventions are always entirely for her own benefit. And when Toby once again

rejects Elizabeth's flirtatious suggestion that they should work together as a team, things start to look very tricky. In this high profile series, a co-production between Jonathan M. Shiff Productions and ZDF Studios, the actual state of scientific research is taken as a basis, with a playful approach adopted towards the missing link in current research.

The style is wacky, anarchistic, comic, and bizarre. Our characters are real teenagers with typical teen concerns: romance, music, skateboarding, not to mention the everyday frictions of school and family. Each episode will be an individual story featuring at least one 'Wicked Science' phenomenon, with the scientific genius of Toby or Elizabeth going head-to-head.

Genre	Children
Format	26 x 26'
Producers	Jonathan M. Shiff Prod., Film Victoria, FFC Australia, Daniel Scharf
Co-Producers	ZDF Studios, ZDF, Network 10
Available	first season – 13 episodes available second season – 13 episodes in Jan. '04
