- Accent on visual comedy and fun-filled action sequences
- Innovative new comedy series with strong educational values

Igam Ogam

You think life in the Stone Age was no fun? Meet Igam Ogam, who's ready to prove you wrong! More bubbly than an active volcano, more curious than a Curiosaurus, she's a fun-loving little cave-girl who tackles the daily challenges of growing up with invincible optimism and her comfort blanket!

Preschoolers are in for a big treat with this fresh and innovative stop-frame animation series in bite-sized 10-minute episodes. Little pig-tailed Igam Ogam is a mischievous toddler who's curious about everything around her. And like the preschoolers and kindergarten-aged kiddies watching from home, she's totally into playing, having fun, making experiences and learning about our wonderful world – even if there are more dinosaurs around than people!

For Igam Ogam, every day means a new adventure. And, above all, it means playing with her friends Roly, a super-fast,

banana-obsessed monkey; Doggy, a baby dinosaur who loves to lick his friends; Birdie, a small pterodactyl who's much wiser than Igam Ogam; and Triple Tog, a saber-toothed tiger duvet and voice of reason. Never far away is Big Daddy, who lovingly watches over Igam Ogam and her friends.

Whether “stealing” the sun, wanting back a gift she's just given, getting on everybody's nerves with her singing, or trying to get out of taking a bath or cleaning her room, Igam Ogam infuses each fantasy-filled episode with her irresistible charm. Produced by award-winning children's and family entertainment specialist Calon TV (Hanna's Helpline) in coproduction with Five, S4C and ZDF Studios, “Igam Ogam” puts the accent on visual comedy and humorous action sequences that will have toddlers asking for more Stone Age adventures!
